REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. In interpreting the claims, in light of the specification and the applicant's amendments and remarks filed 06/30/2010, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach "a method for determining the activation of proxy server services user who is using at least one cellular network to visit content accessed by various hyperlinks that are associated with a content server, through at least one proxy server, the contextual location relating to a communication link currently used by the mobile device user, the method being executed by the at least one proxy server, the method comprising: configuring proxy services actions by defining for each service a sequences of hyperlinks titles of the content server which correspond to contextual location within the content server, wherein said defining is preformed by the proxy server operator; receiving, from the content server and through the at least one proxy server, user visited content that includes embedded hyperlinks that are each associated with a corresponding title and a corresponding target uniform resource locator (URL), wherein each title is presented to the user over .a webpage having a different URL than the target URL; parsing the received content, extracting the embedded hyperlinks and their corresponding titles and target URLs, and storing the hyperlinks, each title being associated with a respective target URL, wherein each target URL is a dynamic URL comprising periodically changing code numbers identifiable, in real-time, only by the content server; upon receiving a subsequent URL request, extracting a corresponding hyperlink title from a previously stored hyperlink based on the subsequently requested target URL; creating a short term user surfing course comprising a sequence of hyperlink titles and a corresponding target URLs sequence; and identifying the

Art Unit: 2445

contextual location of mobile device user within the content server by (i) comparing the sequence of user selected hyperlink titles of the short term user surfing course with a plurality of predefined sequences of titles stored in a database wherein the predefined sequences of titles were defined by the proxy operator, and (ii) identifying at least partial selected sequence which is similar to hyperlinks titles sequence in the database, wherein each hyperlinks titles sequence .in the database is associated with a corresponding contextual location, determining the activation at least one proxy server service, wherein the activation of the service is based on identified contextual location of the user, wherein the receiving, the parsing, the identifying, and the comparing are performed by at least one computer throughout the user surfing session” as recited in and as required by the Applicant’s independent claims. The limitations of the independent claims are allowable subject matter over the prior art, in light of the specification.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. Claims 4-13, 16-25, and 29-30 are allowed.

Conclusion

Any inquiry concerning this communication should be directed to Vivek Srivastava at telephone number 571-272-7304.
